

Figure S2: Diurnal course of measured activities (at least $n = 5$ per group) for (a) NR, (b) GS, and HPR (c). In red the wildtype and in blue the *hpr1-1* mutant. Dashed boxplots represent ambient CO_2 concentrations. Dotted boxplots represent elevated CO_2 concentrations. Light phase indicated by yellow bar and dark phase indicated by black bar. Boxplots are dodged by 0.25 h in order to prevent overlapping.
